### Product Information

*Polar Flux Remover* is an economical flux remover for cleaning aged and heavy baked-on fluxes. The residue-free formula works on R, RA, RMA, and no-clean fluxes for both tin and lead solders and high temperature lead-free solders. It quickly penetrates and dissolves excess flux and removes ionic and non-ionic activators that cause white residues. It dries residue free.

This extra-strength flux remover cleans all types of flux, pastes, inks, finger prints, oxides, oils, and grease. It also effectively dissolves many adhesives and silicone fluids commonly found on electronic assemblies. Use *Polar Flux Remover* on printed circuit boards, FR-4, components, connectors, cables, and mechanical assemblies. Test before use on plastics.

Dispense directly from the can or use with the *MicroCare TriggerGrip* cleaning system for faster, safer, and more economical process of cleaning printed circuit boards at the work bench. This option cuts cleaning costs by reducing fluid use by 66%.
