

ESD Safe Bench Mounting Kit

- ESD Safe
- Rugged Construction
- Years Of Trouble Free Service

General Information

You are using the MicroCare ESD Safe Bench Mounting Kit (#MCC-BK2). This quality kit provides a safe and convenient method of organizing the work area. When used properly, it will keep your MicroCare cleaning system in a convenient location near the bench top.

This rugged kit will accept all MicroCare aerosol cleaning products. It is engineered to provide protection to ESD sensitive components. Manufactured with sturdy steel alloy materials, this kit assures years of trouble-free service.

About the Product

Installation:

Tools Required, Phillips screwdriver, Power drill, and #36 drill bit.

For best use of this kit, observe the following guidelines during installation:

The external tooth countersunk washers are designed to pierce the coating on the Trigger Grip Holster when the screws are tightened. This will assure that a proper ground is available to maintain ESD safe use.

Always locate the mounting cage for the aerosol can below the workbench and away from eyelevel. Ideal locations include workbench legs or side supports.

Never position the mounting cage so the aerosol can is at eyelevel. Accidental aerosol discharge to the eyes or face may cause irritation or injury.

Locate the Trigger Grip Holster so it is positioned within easy reach and situated to favor the operator's right-hand or left-hand preference.

Do not mount this kit where it will interfere with drawers, doors, solder iron tips, compressed air outlets, electrical outlets, heatguns or where normal movement during operation will be restricted.

Remember, thoughtful placement of the ESD Safe Bench Mounting Kit assures an efficient workstation and will prevent equipment damage and / or personal injury.

Packaging

MCC-BK2 1 per package / 10 packages per case

Contents:

Qty	Description
5	#6 Pan Head Phillips Screws
2	External tooth lock washers
1	Aerosol Can Cage
1	Trigger Grip Holster
