MicroCare Has Better, Safer IPA Alternative Cleaners

Since the COVID-19 outbreak, some electronics manufacturers are experiencing IPA (isopropyl alcohol) shortages. Fortunately, MicroCare offers excellent IPA alternatives for cleaning electronics and printed circuit boards. Many of the IPA substitute cleaners are safer to use than IPA. Some of the IPA replacements include:

Flux Removers – Unlike IPA, all IPA substitutes are nonflammable for added worker safety.

- **General Purpose Flux Remover** is excellent at cleaning rosin and no-clean flux residue. There are versions to meet North American, Asian and European environmental regulations. It is a good substitute for IPA when cleaning electronics.
- **Universal Flux Remover** removes grease, oil, fingerprints and fluxes. It comes in formulas for compliance with North American, Asian and European environmental regulations. It is an excellent IPA replacement cleaner for electronics.
- **SuprClean™ Heavy Duty Flux Remover** is ideal for removing high-temp RA and RMA fluxes as well as acrylic conformal coatings. It is available in formulations to meet North American, Asian and European environmental regulations. It makes an ideal cleaning replacement for IPA.

All IPA alternative cleaners are nonflammable for safety.

No-Clean Flux Remover Cleaning Pen is perfect for spot cleaning PCBs.

No-Clean Flux Remover Cleaning Pen is a handy tool for pinpoint cleaning PCBs.

ESD Cleaning Wipes clean and protect static sensitive surfaces.

ESD Wipes won't dry out ESD mats.

MicroCare Aqueous Stencil Cleaner removes all kinds of chip bonders, solder pastes and adhesives.

ScreenClean™ Stencil Cleaner cleans ink without harming emulsions or screens.

MicroCare Reflow Oven Cleaner quickly removes baked-on flux residue inside reflow ovens. It is a safe, nonflammable isopropyl alcohol replacement.

MicroCare Aqueous Stencil Cleaner makes short work of cleaning screens.

MicroCare Reflow Oven Cleaner removes baked-on flux residue without a lot of scrubbing.

ScreenClean™ Stencil Cleaner is a powerful, yet gentle cleaner.
