

The Next Generation of Precision Cleaning is Here

Tergo™

Performance Fluids

Engineered for Vapor Degreasers

Remove fluxes, lubricants, dust, metal particulate, inks, fingerprints, waxes, binders or other contaminant from electronics and manufactured parts before processing or assembly.

- **Low Viscosity:** Tergo™ fluids permeate into tight spaces and blind holes to flush out soils and leave parts clean and dry
- **High Solvency:** Tergo™ fluids rigorously displace stubborn soils without damaging substrates or flash rusting
- **Sustainable:** Low GWP (Global Warming Potential) and zero ODP (Ozone Depleting Potential) fluids lighten your environmental footprint
- **Excellent Replacements:** Easily replace trichloroethylene (TCE), n-propyl bromide (nPB), benzene, Perchloroethylene (Perc) and methylene chloride
- **Fast Drying:** Won't leave spots or residue
- **Maintenance-Free:** Eliminate the need for acid acceptance testing and scavengers
- **Nonflammable:** Improve facility and worker safety
- **Compliant:** Meet RoHS, HAP, REACH, F-Gas, and SNAP requirements
