

Fiber Optic Cleaning Kits Recommendations for FTTH/HFC Networks

FTTA Network Overview

- Fiber To The Home (FTTH) and Hybrid Fiber Coax (HFC) networks use 2.5mm based SC/APC connector systems
- SC/APC connector is dominate since most of the networking gear manufacturers use the SC/APC duplex for their network interface

Where to Locate the FTTH Builds

The latest FTTH announcements in North America are shown here;
there are many more globally

Sticklers™ Products for FTTA Environments

2.5mm CLEANSTIXX™ Sticks

P/N: MCC-S25

- Box of 50 sticks
- Clean in adapter & multiport drop enclosures

CLEANWIPES 640 Optical Grade Wipes

P/N: MCC-WCS640

- 8 slot cleaning window spaced for LC & SC duplex with static dissipative medium
- Plastic sealable box
- Use wipes for cleaning connectors & for cleaning fiber for splicing pigtails

Sticklers™ Cleaning Fluid

P/N: MCC-POC03M (3oz can)

P/N: MCC-POC10M (10oz can)

- Can will not spill or cross contaminate
- Use for wet-dry cleaning & fiber slicing

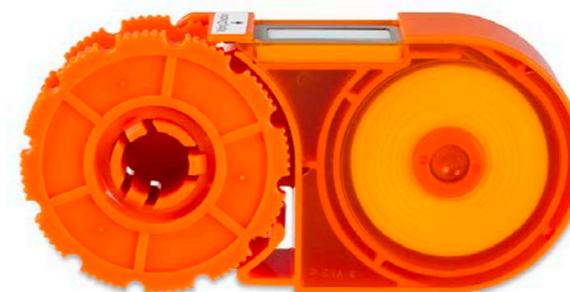

Sticklers™ Products for FTTA Environments

2.5mm CLEANCLICKER™ 750 Cleaner P/N: MCC-CCU250

- Provides 750 engagements & REFILLABLE
- Cleans in adapter & multiport drop enclosures & SC assemblies and drop cables

Cassette CLEANCLICKER™ cleaner P/N: MCC-CCWRC

- Microwoven fabric cleaning ribbon
- Manual advancement of cleaning ribbon
- Static dissipative medium in cleaning window
